

P417

P417 -UK Renal Trials Network (UKRTN)

Dr William Herrington², Dr Thomas Hiemstra¹

¹Cambridge, , ²Oxford, ,

Our aims:

Our Network was established to facilitate the design and delivery of nephrology clinical trials in the UK. We support investigators in the development and conduct of clinical trials, in order to improve treatments for patients living with kidney disease. Through establishing and maintaining links with other international renal networks, the network aims to facilitate the delivery of global randomised control trials.

Who we are:

Our Network offers expertise in trial design, conduct, analysis and reporting. Our membership includes clinical trialists, statisticians, a health economist, trial manager, trials research nurse specialists, epidemiologists and patient experts.
