

WORKSHEET FOR KIDNEY SESSION 2

ACUTE KIDNEY INJURY

1. How many stages of acute kidney injury (AKI) are there?
2. What tests are needed to classify the stages of AKI?
3. Identify 3 major types of acute kidney injury
4. List two possible causes of the three main types (six causes in total)
5. When assessing a patient's fluid status, list the possible observations and/or measurements you might make to conclude whether he/she is fluid overloaded or dehydrated.
6. Reflection
Think about the questions that people with AKI might have during the COVID19 outbreak.
Write down 4 questions and then look at the links on the slide I have given you to see if the questions can be answered.
